

PURE™ Formaldehyde Free Clear Systems

A greener solvent-based system
that is a drop-in replacement

HIGH QUALITY INTERIOR WOOD FINISHES

Proudly engineered and
manufactured in Canada

PURE™

FORMALDEHYDE FREE CLEAR PRE-CAT & CV SYSTEMS

HIGH QUALITY INTERIOR WOOD FINISHES

Utilizing KCI's GreenCure™ technology, the Pure™ family of coatings are designed to be drop-in replacements for most standard pre-catalyzed or conversion varnish systems with little or no equipment or process changes.

These advanced products feature KCI's GreenCure™ technology; a unique cross-linking mechanism that does not contain or liberate formaldehyde during the drying or curing process. The Pure™ family of products meet LEEDS, IAQ, GREENGUARD and BIFMA standards for formaldehyde free designation.

FK8 PURESEAL™ Formaldehyde Free Vinyl Sealer

26% weight solids; 18% volume solids
HAPs Free, low odour, very user-friendly
10% reduction with lacquer thinner if necessary
Can be catalyzed 5% with 3CAT Formaldehyde Free Acid Catalyst for use under KV Series PUREVAR™ Formaldehyde Free Conversion Varnishes

KP Series PUREGUARD™ Formaldehyde Free Pre-Cat Topcoats

31% weight solids; 25% volume solids
HAPs Free, low odour, very user-friendly
10% reduction with lacquer thinner if necessary
Self sealing or with FK8 Pureseal™ Formaldehyde Free Vinyl Sealer
Available in 15, 25, 35 and 90 degree sheens.

Passes KCMA performance testing. Meets AWI/AWMAC System #3 Performance Standards.

KV Series PUREVAR™ Formaldehyde Free Conversion Varnishes

43% weight solids; 35% volume solids
HAPs Free, low odour, very user-friendly
10% catalyst using 3CAT FF Acid Catalyst
Self sealing or with FK8 Pureseal™ Formaldehyde Free Vinyl Sealer
Available in 15, 25, 35 and 90 degree sheens.

Passes KCMA performance testing. Meets AWI/AWMAC System #3 Performance Standards.
