

KATILAC COATINGS INC.

DuraprimeTM

Conversion Varnish Primers

Premium pigmented conversion varnish primers for cabinetry & millwork

Duraprime™

Conversion Varnish Primers

D28 DURAPRIME™ White and D17 DURAPRIME™ Neutral are solvent-borne, two component alkyd/amino resin based conversion varnish primers. They are high solids undercoats that provide excellent filling properties and excellent adhesion for KCI's conversion varnish topcoats; specifically the D9/D9N Series SUMMIT™ White and Neutral Conversion varnish topcoats. When priming non-porous hardwoods like hard maple, a coat of EK8 KATILAC™ Vinyl Sealer should be used to help promote better adhesion.

D17 DURAPRIME is a neutral tint base primer that is designed to be tinted with Chromaflo 844 series colorants to achieve dark colours.

Features

- 62% weight solids; 42% volume solids for D28 White
- 60% weight solids; 45% volume solids for D17 Neutral
- 10% catalyzation
- ~8 hr pot-life for D28; ~2 hr pot-life for D17
- T4409 Lacquer Thinner Slow or T5247 High Flow Reducer is recommend to maximize pot-life; 10-20% reduction is recommended
- Excellent MDF adhesion
- Excellent filing and sanding properties

Also available:

Duraprime HH™

High Hide White Post-cat Primer

D28HH DURAPRIME™ High Hide is the high build, higher hiding version of D28.

Features

- 68% weight solids; 49% volume solids
- Increased filling properties when compared to D28
- Excellent MDF adhesion
- Fast drying and easy to sand
- Ultra-low formaldehyde
- 10% catalyst; ~2 hr pot-life

Extend Prime™

Extended Pot-Life White CV Primer

DX48 EXTEND PRIME™ is engineered to be used under KCI's D9 & D9MAX Series SUMMIT™ topcoats.

Features

- 56% weight solids; 43% volume solids
- 10% catalyst; ~48 hr pot-life
- Excellent adhesion to MDF
- Ultra-low formaldehyde
- Excellent filling properties
